

FOR IMMEDIATE RELEASE

LOCAL TECHNOLOGY FIRM BECOMES GLOSTREAM PLATINUM PARTNER

Technology Provider Atmosphere Solutions Now Qualified to Sell and Support gloStream Electronic Medical Record and Practice Management Solutions

Tempe, Ariz. [June 19, 2009] - Atmosphere Solutions, an information technology solutions provider distinguished by its strong customer relations focus, announced today that it has become a gloStream Platinum Partner. As such, Atmosphere Solutions has proven it has the IT proficiency and capability to sell and support gloStream's voice-enabled, Microsoft Office embedded electronic medical record software, and practice management solutions to physician practices.

"Technology shows great promise to transform quality of care while simultaneously improving productivity and efficiency for doctors and their staffs," said Vishal Wadher, Chief Technology Officer at Atmosphere Solutions. "We want to help doctors experience these benefits and with gloStream technologies we're now able to offer local doctors important tools and be part of a community of the best IT providers nationwide."

The gloStream partner program offers Atmosphere Solutions access to sales, marketing and support tools, special trainings and a variety of other programs. The organization will use these tools to enhance its brand recognition and increase its footprint within the healthcare community while providing valuable local support to the physicians they serve.

"We're thrilled to have Atmosphere Solutions onboard as a gloStream Platinum Partner," said John Bamberger, gloStream's Chief Channel Officer. "Their understanding of technology and advanced networking will help medical professionals throughout Arizona realize the tremendous benefits of our Microsoft Office embedded electronic medical record solutions."

About gloStream

Bloomfield Hills, Mich.-based gloStream provides physicians and healthcare facilities with certified electronic medical record and practice management solutions delivered and supported through a nationwide network of local technology partners. gloStream products are secure, easy-to-use

applications and the only integrated EMR/PM solutions on the market embedded with Microsoft Office. Through a simple user interface, robust voice recognition technology, and single-click access to all patient information, gloStream products help doctors improve patient care by streamlining workflow and creating efficiencies in office administration.
